

# Md Hafiz

## SENIOR ANDROID DEVELOPER

+91 8092308016 | [mdhafiz7215@gmail.com](mailto:mdhafiz7215@gmail.com) | [LinkedIn](#) | Noida

### Professional Summary

Senior Android Developer with 8.5+ years of experience building production-grade Android applications across news, healthcare, and automotive domains. At Indian Express, delivered apps surpassing 1M+ downloads and contributed to a 15% crash reduction at ZMQ Technology, using Kotlin, Jetpack Compose, MVVM, and Clean Architecture to drive stability and scale.

### Technical Skills

**Programming Languages:** Kotlin • Java

**Android Development:** Android SDK • AndroidX • Jetpack Compose • XML • Material Design • Android Automotive OS • Navigation Component • ViewModel • LiveData • Room • WorkManager • DataStore • Paging 3

**Architecture & Design Patterns:** MVVM • MVI • Clean Architecture • SOLID Principles

**Concurrency & Reactive:** Kotlin Coroutines • Flow • StateFlow • SharedFlow

**Networking & APIs:** Retrofit • REST APIs • JSON

**Dependency Injection:** Hilt • Dagger

**Firebase:** Firebase Crashlytics • Analytics • FCM • Remote Config • Dynamic Links

**Media:** Media3 • ExoPlayer

**Database:** SQLite

**Testing:** JUnit • Mockito • Espresso • Unit Testing • UI Testing

**Performance & Debugging:** Crash Analysis • ANR Analysis • Performance Optimization • Debugging Tools

**Tools & Utilities:** Google Play Console • Android Studio • IntelliJ IDEA • Git • CI/CD • JIRA

**Third-Party SDKs:** MoEngage • CleverTap • Razorpay • Google Play Billing

**Soft Skills & Practices:** Team Mentoring • Code Reviews • Agile Development • Release Management

### Professional Experience

#### Indian Express | Senior Android Developer

- Developed and maintained production **Android applications** — The Indian Express, Financial Express, Loksatta, and IE Car — collectively surpassing 1 million cumulative Google Play downloads.
- Built the Indian Express Car App for **Android Automotive OS**, delivering a modular in-car entertainment experience for podcasts and short-form content.
- Architected scalable Android applications using **MVVM and Clean Architecture**, enhancing modularity, maintainability, and long-term feature development velocity.
- Established **Navigation Component** patterns, deep linking, and structured user journeys to streamline navigation flows across multiple Android applications.
- Integrated **Firebase services** — Analytics, FCM push notifications, Remote Config, Dynamic Links, and Crashlytics — to support real-time configuration and user engagement.
- Diagnosed and resolved production crashes and ANRs using **Firebase Crashlytics** and Google Play Console, improving application stability and release quality.
- Incorporated third-party SDKs including **MoEngage, CleverTap, Razorpay, and Google Play Billing** to support marketing automation and in-app monetization.
- Conducted technical **code reviews**, enforced clean-code and architecture standards, and contributed to cross-project technical decision-making.
- Mentored a team of four Android developers, providing technical guidance, reviewing implementations, and supporting timely delivery of production features.
- Operated within **Agile development** processes, coordinating feature delivery, debugging, testing, release cycles, and ongoing production support.
- Applied **Kotlin Coroutines and Flow** to manage asynchronous data streams and concurrency, improving UI responsiveness and overall app performance.

**Technologies Used:** Kotlin, Java, Jetpack Compose, Android SDK, MVVM, Clean Architecture, Navigation Component, Firebase Crashlytics, Firebase Analytics, FCM, Remote Config, Dynamic Links, MoEngage, CleverTap, Razorpay, Google Play Billing, Media3, ExoPlayer, Android Automotive OS

## ZMQ Technology for Development | Software Engineer

- Designed, developed, and deployed **Android applications** from scratch for healthcare and social-sector use cases, owning the full development lifecycle.
- Built Vishwaas Toolkit and ASHA Case Management Toolkit using **Kotlin and Java**, contributing to solutions that reached 500K+ users.
- Diagnosed and resolved issues in **location tracking and data synchronization**, contributing to a reported 15% reduction in production crashes.
- Integrated **Firebase** for secure cloud storage and real-time data updates, ensuring reliable offline-to-online data synchronization.
- Strengthened **app performance and stability** through data synchronization improvements and targeted Android optimization techniques.
- Launched 4+ health-tech Android apps — including TB StoryTeller and Pneumonia StoryTeller — to **Google Play** for large-scale public-sector use.
- Delivered **Android SDK**-based applications for large-scale healthcare deployments, supporting field workers across public-sector health programs.

**Technologies Used:** *Android, Firebase, Kotlin, Java*

## Education

---

### Bachelor of Technology (B.Tech) — Computer Science & Engineering

2017

Dr. A.P.J. Abdul Kalam Technical University

## Selected Projects

---

### Indian Express

- Engineered and maintained a **production-grade Android news app**, delivering features for news feeds, subscriptions, and deep linking.
- Integrated **Firebase push notifications, GA/Firebase Analytics, and MoEngage** tracking to drive user engagement and retention.
- Resolved **ANRs, Crashlytics-reported crashes, and production issues**, improving app stability and user experience.
- Managed **Play Store releases**, performance optimization, and ongoing debugging to ensure consistent production delivery.

### Loksatta

- Built and maintained a **Marathi-language Android news platform**, implementing news feeds, subscriptions, and deep linking.
- Configured **Firebase push notifications, GA/Firebase Analytics, and MoEngage** to enhance audience targeting and engagement.
- Diagnosed and resolved **ANRs and Crashlytics-flagged crashes**, strengthening production stability.
- Coordinated **Play Store release cycles** and performance tuning to sustain reliable app delivery.

### Financial Express

- Contributed to a **scalable Android business-news platform** using Kotlin, Java, MVVM, and Jetpack components.
- Delivered features for **subscriptions, push notifications, and deep linking** within a modular, maintainable architecture.
- Incorporated **analytics SDKs** and resolved production issues to ensure stability across releases.
- Executed **Play Store deployments**, debugging cycles, and regression testing to uphold release quality.

### IE Car — Android Automotive

- Architected a **modular Android Automotive app** with automotive-specific UX, navigation, and media playback.
- Integrated **Media3/ExoPlayer** for seamless in-vehicle audio and video streaming experiences.
- Optimized **app stability and performance** to meet automotive platform standards and production delivery requirements.

### Vishwaas Toolkit / ASHA Case Management Toolkit

- Built an **offline-first Android app** with local storage, data synchronization, and dynamic form rendering for field workers.
- Integrated **Firebase and backend APIs** to enable real-time data sync and reliable updates in low-connectivity environments.
- Developed and sustained applications supporting **large-scale healthcare deployments** across distributed ASHA worker networks.

## Key Achievements

---

- IE Hack 2023 Winner — Recognized for work focused on improving application notification click-through rate.
- Employee of the Year – 2020 — Recognized for outstanding contributions.
- Employee of the Month – 2025 — Recognized at The Indian Express Pvt Ltd for outstanding contribution and delivery impact.
